# User Levels/Privileges

(Last Updated 5-5-2010)

**Reviewer**

- o  can review volumes with status 0-1; priority 0-2
- o  can view and edit unprocessed reviews
- o  can set a "hold" on unprocessed reviews for up to 72 hours
- o  can view historical reviews
- o  can view their own user stats
- o  matching reviews (with other reviewers) become status 3s and must be reviewed or accepted by an expert

**Advanced Reviewer** (all above plus)

- o  matching reviews (with other reviewers and advanced reviewers) become final

**Expert** (all above plus)

- o  can review conflicting (status 2) reviews and provisionally matching (status 3) reviews
- o  can review any reviews with priority level 0-3
- o  can accept and finalize matching reviews (automatically generate "dummy" reviews)
- o  can add new review that overrides matching reviews
- o  can neutralize prior reviews (all prior reviews that don't agree with expert's final review are not invalidated)
- o  can view user accounts and can change to one's own alternate identities (e.g. regular or advanced reviewer identities, must use same base/Kerberos username)
- o  can view queue and active reviews
- o  can view all report interfaces (all user review rates; queue status, export stats, determinations breakdown
- o  can query rights database

**Admin** (all above plus)

- o  can add, modify and delete user accounts
- o  can change identities to be any other user of equivalent or lower user level
- o  can clear locked items
- o  can add volumes to the queue (as priority level 0-3)
- o  can change system status and create/display system-wide messages

**Super Admin** (all above plus)

- o  can add volumes to queue as priority level 4 and review priority 0-4
- o  can process current day's reviews in Dev (for testing purposes)
- o  can use the debugging facilities on the System Administration page
