- **Total Reviews.** This number is the total of all Public Domain, In-Copyright, and Undetermined <u>finalized</u> reviews. This number does not include:
  - Reviews still active and/or not yet moved to historical reviews (see **Reviews Awaiting Verdict** below)
  - Legacy reviews (pre-CRMS reviews)
- **Non-Expert Reviews.** This is the total number of non-expert reviews (total reviews less expert reviews) and the percentage this represents out of the total reviews.
- **Neutral Reviews & Rate.** This is total number of reviews that received a neutral verdict by an Expert along with the percentage of neutral reviews out of the total reviews.
- **Invalidated Reviews & Rate.** This is total number of reviews that were invalidated by an Expert and the percentage of invalidated reviews out of the total reviews.
- **Invalidation Rate (all reviewers).** This percentage represents the sum total of in invalidated reviews for all (non-expert) reviewers, divided by the total number of (non-expert) reviews. The row is included in each reviewer's individual review stats table as a point of reference to compare their invalidation rate against all CRMS reviewers. (Note: My Review Stats pages display Validation Reviews/Rates as opposed to Invalidated Reviews/Rates.)
- **Time Reviewing (mins).** This is the total number of minutes spent reviewing by the all reviewers (added together) as calculated from the time a new review is opened and until it is submitted. This does not include time spent beyond 5 mi**nutes on** a single review (see **Outliers**).
- **Time per Review (mins).** This number is derived from a calculation that takes the **Total Reviewing minutes** and divides it by the **Total Reviews,** less **Outliers**.
- **Reviews per Hour.** This number is derived from a calculation that takes the **Time per Review** and multiplies it by 60.
- **Outlier Reviews.** This number represents the total number of reviews in which the reviewer took more than 5 minutes to complete and submit.
